FOR IMMEDIATE RELEASE

OSC World Partners with Albany Region Based Test Scorer Premier Assessment Services to Expedite Scoring of State Exams

Long Island test scoring technology leader expands reach in Hudson Valley

LYNBROOK, NY – July 14, 2015 – OSC World, a leading provider of scoring and test scanning technology services for school districts in New York State, has partnered with Albany-based test scorer Premier Assessment Services, Inc. OSC World processes millions of pages of New York State tests for BOCES and schools districts across New York State.

Lynbrook-based OSC World has purchased a 50 percent stake in Premier Assessment Services from owners BethAnne Hutchinson and Valerie Jennings. The company will continue to operate as Premier Assessment Services, but will combine Ms. Hutchinson's and Ms. Jennings's vast experience scoring paper-based exams with OSC World's industry-leading electronic test scoring software and scanning capabilities, bringing the firm into the digital age.

As part of the agreement, OSC World will provide Premier Assessment Services with software and technology to assist in expediting scoring of New York State examinations in the Albany and Hudson Valley regions. The partnership will expand OSC World's footprint in a critical market in New York allowing the companies to offer comprehensive services to school districts.

Premier Assessment Services is under contract with Sullivan County schools to conduct hand scoring for thousands of state exams. OSC World conducts scoring for approximately 1.2 million Regents and other mandated State exams each year.

"This partnership will give us the technology to more rapidly and more effectively score tests for our clients, the school districts in the area, and to begin a dialogue with other school districts about effectively serving them in the future," said Premier Assessment Services co-owner BethAnne Hutchinson.

"We welcome BethAnne, Valerie and their company to the OSC World family. Our two organizations have similar philosophies toward grading and test management. Working together we will utilize our technology so that they can be more effective in their market. This relationship will allow us to continue our drive to become the country's leading provider of test processing and scoring services," said Jeffrey Schneider, EVP Research and Development, OSC World.

For more information about OSC World and its industry-leading test scoring, management and data capture services visit www.oscworld.com.
